ISO 9001:2000 Certified

Our Goal:

At AMTech our goal is to develop strategic partnerships with our customers. AMTech specializes in multiple facets of the OEM tubing process including cutting, deburring, bending, and assembling. Each process is completed under ISO 9001:2000 standards allowing us to meet your tolerances and comply with your just-in-time requirements.

Our Capabilities:

Tube Production - .250" - 2" O.D.

- One Abbey Etna 1K stainless steel tube mill
- Two Turek & Heller WU-11 stainless steel tube mills
- One Turek & Heller WU-20 stainless steel tube mill

Tube Cutting - .250" - 4" O.D.

- High-speed Haven Tube Cutting & Deburring line capable of holding very tight tolerances
- Five automated saw cut tube lines complete with Brush and Vibratory Deburring capabilities
- Two automated state of the art Burr Oak rotary cut machines with uncoiling, straightening, and tube sizing capabilities
- Three automated Modern Lathe cut machines

Tube Bending - .250" - 2.5" O.D.

- Burr Oak Hair Pin Benders with capability for stainless steel, carbon steel, and copper tubing
- Rotary Draw Mandel tube bending

Other Capabilities

- Double end finishing equipment capable of OD & ID chamfering
- Vibratory Finishing Capabilities

Our Commitment to Quality:

- Increasing customer satisfaction through continual improvement of products, services and quality management systems
- Meeting customer specifications
- Achieving 100% on-time delivery
- Competitive pricing

" We don't have time for mistakes. We know when we place an order with AMTech it will be done correctly and within the time frame they have quoted."

– an HVAC AMTech customer
